

# Wikoff Color Captures More Green by Controlling Waste Management Costs

**Wikoff Color's mission is to be the most responsive manufacturer of ink and coatings for technically demanding print and packaging customers. As an employee-owned company, Wikoff focuses on sustained, profitable growth rather than short-term results.**

Operating 26 North American locations, Wikoff believed they could do more to reduce their waste management costs. However, because the waste included hazardous and non-hazardous chemicals, waste water and general trash, they were unsure how to proceed without exposing the company to future risks and liabilities.

**Expense Reduction Analysts helped Wikoff control waste management costs which led to a 20% savings.**

Wikoff engaged ERA's waste management specialists to conduct a thorough review of their activities in the waste area. ERA's recommendations led to an overall reduction in waste management costs. In addition, Wikoff's leadership achieved greater control over waste management practices at its various locations, and assurance that the company was fully complying with all regulations.

## Project Information

<b>Expense:</b>	<b>Waste Management</b>
<b>Industry:</b>	<b>Manufacturer of inks and coatings</b>
<b>Supplier:</b>	<b>Incumbents</b>
<b>Savings:</b>	<b>20%</b>
